## STRONG ORGANIC GROWTH SUPPORTS OUTLOOK

We believe the Saudi Retail sector outlook remains positive, led by strong earnings growth from store expansions, strong organic growth, margin stability and Saudisation pressures easing. Announcements on opening the market helped the sector in expanding YTD gains to $50 \%$, with expectations that international investors will be interested in this sector given the demographic and economic strengths of Saudi. Our PTs increased upon reducing the additional risk premium. We upgrade AI Othaim to Overweight, downgrade AI Hokair to Neutral, while maintaining other ratings.

## - Positive outlook on strong organic growth and expansions

The outlook for the Saudi Retail sector remains strong supported by strong organic growth, store expansions and margin expansions. EIU expects a CAGR $7.8 \%$ growth for the sector till 2018E. We expect organic growth to stand between $8-10 \%$ for companies such as Al Hokair and AI Othaim. Moreover, covered companies are expanding by adding new stores locally and internationally, which will be a catalyst that drives growth for the sector.

- Upgrade AI Othaim to Overweight, downgrade AI Hokair to Neutral We upgrade AI Othaim to Overweight (PT SR127.1) on new store openings, margin stability, strong organic growth outlook and overcoming the negative effects of Saudisation. Al Othaim trades at a 2015E P/E of 19.0x vs. sector at 24.5 x which is relatively attractive provided the strong fundamentals. We downgrade Al Hokair to Neutral (PT SR123.5) on fair valuation and the relatively unchanged outlook. Al Hokair trades at a 2015E P/E of 30.4x.
- Maintain ratings on the remaining stocks under coverage We remain Neutral on Jarir and Extra while Overweight on Shaker. Although Jarir has a strong balance sheet, dividend track record and prudent management, we believe the valuation is fair at the current levels. However, we maintain our Overweight rating on Shaker given the improved outlook for the company, as the AC market stabilizes.
- Opening of the TASI to have a net positive effect on the sector

Due to the opening of the TASI to international investors, we expect a significant inflow of foreign capital to the market. We believe the retail sector will be a beneficiary due to the strong macro-economic outlook, rising disposable income and growing population. We expect this move to reduce the risk premium assumed, resulting in re-rating and multiple expansion.

## Mohamed Tomalieh

## Outlook for the Saudi Retail sector

## Retail outlook remains strong, on demand growth and expansions

- EIU data reflects a strong growth outlook for the Saudi retail sector

The Economist Intelligence Unit (EIU) expects Saudi's retail sector to record a CAGR of $7.8 \%$ in sales by 2018E (US\$140bn in 2018E vs. US\$96bn in 2013). This is due to favorable macro factors such as demographics (64\% under the age of 34), governmental spending and increasing income per capita. We expect a strong growth for the sector with the revenues of covered stocks increasing at a CAGR of $13 \%$ during 2013-18E.

Exhibit 2: Saudi retail sales outlook (US\$bn)

Source: EIU January 2014

## - POS data reveals acceleration in retail spending

POS data are a proxy of the retail activity. The latest data shows acceleration in spending particularly in the past two months. Total transactions value and volume increased $23 \%$ and $11 \%$ YTD, respectively. During 2009-13, the value and transactions more than doubled to SR144bn and 294 mn , respectively. Moreover, the average ticket size grew to SR507 YTD vs. SR451 in 2009.

## Key sector drivers: store expansions and organic growth

- Successful execution of store expansion to drive top-line growth

Revenue growth through store expansion remains one of the key drivers for the sector. This, supported by consolidation in the retail sector's fragmented market, is the key advantage of larger retailers to increase market share. The majority of the top retailers have expansion plans to drive top-line growth. However, execution risks remain a concern given the recent changes in the labor market which had a direct impact on contractors. This may be seen through the lower-than-expected store openings in 2013. In general, we are relatively conservative in our estimates for store expansions vs. management guidance. For example, Al Othaim management expects to open 15 stores annually, while we assume 710 stores annually.

Exhibit 5: New store openings in 2014 vs. new stores in 2013
Stores

|  | Targeted in 2014 | Opened in 2013 |
| :--- | ---: | ---: |
| Al Hokair* | $200+$ | $200+$ |
| Jarir | 7 | 0 |
| Extra | $3-4$ | 8 |
| Al Othaim | 15 | 13 |

Source: NCBC Research estimates, * 2014E equates to FY15E (year ending March 2015)

## - Sustainable high organic growth for the sector

Organic growth remained high across the sector which supports our strong outlook. Among the stocks under coverage, Al Hokair and AI Othaim have recorded a significant organic growth over the past few years, which the management expects to be sustainable. We estimate an organic growth of 8$10 \%$ for Al Hokair and AI Othaim, going forward. For Jarir and Extra, organic growth expectations range between $4-7 \%$.

## International markets offer growth potential despite FX volatility

- International expansions offer alternative sources of growth

We believe retailers in Saudi could further grow through expansions in the GCC. Leading Saudi retailers have started expanding into other GCC countries. We believe that strong brands, existing distribution capabilities and supply chain management strengths have eased the entry into newer geographies and segments. Al Hokair reported $51 \%$ and $105 \%$ YoY increase in its revenue from international markets in FY14 and 1Q15, respectively. Al Hokair has a wide presence internationally with 611 stores expected in FY15 ( $30 \%$ of total) and an estimated average of 70 new store openings annually. On the other hand, Extra has 3 stores and Jarir has 4 stores outside of Saudi.

- However, FX markets volatility to impact earnings, mainly for AI Hokair With the exception to AI Hokair, We believe that stocks under coverage are less exposed to foreign exchange (FX) risks given their domestic/GCC operations. However, AI Hokair is exposed to this risk as it is expected to generate $26 \%$ of its total revenues from international operations in FY15E. Currently, AI Hokair has presence in more than 10 countries, including the US, Egypt, Jordan, Kazakhstan, Azerbaijan, and Georgia.

In FY13 Al Hokair posted FX gains of SR8.1mn due to the appreciation of the US\$. The appreciation of the US\$ vs. Euro results in lower COGS and increased transaction gains given that the company's major suppliers (such as Zara and Marks \& Spencer) are located in Europe. Although it offers a potential gain in terms of other income, this exposure may increase the volatility of Al Hokair earnings.

## Saudisation remains the main focus

Tightening Saudisation rules not expected to impact covered stocks

- Companies in lower Nitaqat zones are facing pressure from the MoL

Saudisation continue to be the main focus of the government. A new campaign will be launched next month where the Ministry of Labor (MoL) intends to penalize around 17,000 red zone companies. The Nitaqat program, which began in June 2011, aims to reduce the Kingdom's unemployment rate by creating job opportunities for Saudis in the private sector. According to this program, firms are classified under Premium, Green, Yellow, and Red categories based on their Saudisation rate. Companies meeting high levels of Saudisation are rewarded with incentives whereby those that fail to comply face heavy penalties. We believe the impact of this drive to be higher on small players and independent stores in the highly fragmented retail market rather than on stocks under coverage. We believe that these regulations actually help larger retailers, as the market consolidates, to gain market share.

## - Stocks under coverage are relatively safe

For the retail sector, the Saudisation requirement is $17 \%$. All companies under coverage comfortably meeting the requirements and are in the Green band. We expect the renewed MoL campaigns to have a short-term impact on margins, from wage inflation, for companies with a lower percentage of Saudi nationals.

Exhibit 6: High Saudization rates for stocks under our coverage
Company

|  | MCap (USD mn) | Total Employees | Saudization \% | Status |
| :--- | ---: | ---: | ---: | ---: |
| Al Hokair | 6,837 | 12,109 | 46 | Green |
| Jarir | 4,909 | 2,585 | $\sim 40$ | Green |
| Extra | 959 | $\sim 2,500$ | 24 | Green |
| Al Othaim | 1,324 | 8,000 | 27 | Green |

Source: Tadawul, Zawya, Company Reports, NCBC Research estimates

## Positive impact from Saudisation in the long-term

## - Positives include higher discretionary income from employing locals

Despite the short-term concerns, we believe that the increased employment of Saudis in the private sector and higher salaries will lead to higher discretionary consumption. The Ministry of Labor recently announced that the number of Saudis employed in the private sector increased from 0.72 mn to 1.46 mn since the launch of Nitaqat program, with a clear trend of an increasing number of women joining the labour market (women employment grew $85 \%$ YoY to 398,538 in 2013). Moreover, the average monthly salary of Saudis in the private sector increased at a CAGR of $10.9 \%$ during 2010-13. We expect these factors to increase spending power of Saudis and to benefit discretionary retailers such as AI Hokair, Jarir, and Extra.

## Outperformance of the retail sector YTD

## Best performing sector YTD, driven by positive sentiment

- Sentiment driven rally, outperforming the index by 22\%

The retail sector is the best performing sector YTD in the TASI, increasing 50\% and outperforming the index by $22 \%$. We believe this rally is driven by positive sentiment on opening up the market to Flls, in addition to the continued interest on Saudi focused sectors that will benefit from the strong macroeconomic outlook. From companies under coverage, Al Othaim rallied the most, increasing $78.6 \%$ YTD. Aside from re-rating effects, we believe that the strong performance has been supported by the strong earnings growth and positive outlook on the company.

Exhibit 7: YTD performance of stocks under coverage

Source: Tadawul, Bloomberg

From the stocks under coverage, Al Othaim, Jarir, and Al Hokair have a relatively higher free float market capitalization and liquidity (turnover). These factors, along with the strong fundamentals, may make these stocks witness relatively higher FII inflows upon opening up the market and/or joining the MSCI EM Index.

Exhibit 8: Trading activity of our coverage stocks
Company

|  | MCap (US\$mn) | Avg. monthly <br> turnover (US\$mn) | Velocity \% | Free float \% | YTD change |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Al Hokair | 6,837 | 155.2 | $2.4 \%$ | 51.0 | 75.4 |
| Jarir | 4,909 | 127.0 | $2.6 \%$ | 99.9 | 28.5 |
| Extra | 959 | 69.0 | $7.1 \%$ | 38.3 | 21.2 |
| AI Othaim | 1,324 | 202.3 | $15.2 \%$ | 72.3 | 78.6 |
| Shaker | 800 | 139.0 | $16.6 \%$ | 65.5 | 22.8 |

[^2]
## Opening market to Flls, leads to further P/E expansions

## Increased market appetite, on opening to Flls

- Investment inflows from FII expected on joining MSCI EM Index

The CMA has announced in July 2014 that the TASI will open to foreign institutional investors in 1 H 15 . We expect this move to reduce the systematic risk assumed, which may result in a re-rating and multiple expansion. Accordingly, we lowered the additional risk premium of Saudi from $0.90 \%$ to $0.75 \%$. We believe that the retail sector is an attractive area for FII to consider provided the positive macro-economic outlook, rising disposable income and the highly growing population.

- Saudi retail sector multiple up $\mathbf{2 0 \%}$ in one year; continues to trade at a premium vs. emerging market peers
We believe that the continued rally in the Saudi retail sector is due to higher multiples that investors are willing to pay for the retail sector, due to the positives of the sector highlighted above. Therefore, the rally is not solely as a result of an upward revision in earnings estimates for these companies. We believe that opening the TASI to Flls may be another factor that triggers further multiple expansions. Over the past year, the blended forward P/E multiple of the Saudi retail sector has increased by $20 \%$ (17.9x to $21.5 x$ ) vs. $14 \%$ expansion in the P/E of the MSCI EM Retail index. Consequently, the premium of the Saudi retail sector over the MSCI index expanded further to $29 \%$ vs. $22 \%$ during this period.
The 12-month blended forward P/E for AI Othaim, Al Hokair, Jarir and Extra have expanded $53 \%, 49 \%, 25 \%$, and $18 \%$ over the past year, respectively. This compares to the TASI and retail sector at $39 \%$ and $20 \%$, respectively. The consolidated net profit of our four retail names (excludes Shaker) grew $15 \%$ YoY in the past four quarters, which supports our view that the recent rally is also supported by earnings growth. We expect AI Hokair, AI Othaim, and Jarir's earnings to increase $9 \%, 16 \%$, and $20 \%$ YoY, respectively, in 2015E.

**Due to change in the reporting method by Shaker, all profit lines except for net income are not comparable to our previous estimates

## Summary of changes to estimates:

## Al Hokair

- We revised equity risk premium from $8.38 \%$ to $8.0 \%$. This includes a reduction of 15 bps in the Saudi premium, due to opening the market to international investors. This revision, in addition to a slight downward revision in RFR, has added SR11.4 or $11.2 \%$ to our PT.
- We have revised the P/E premium over peers to $30 \%$, from $25 \%$, to match the current historical and forward average premium. As a result, our PT has increased by 2.5\%.

## Al Othaim

- We have revised up our estimates of the back off 1) higher organic growth and 2) improved margins on anticipation of higher incentives/rebates from suppliers. These changes in the fundamentals added SR23.5 or $27.9 \%$ to our PT
- We revised the equity risk premium from $8.38 \%$ to $8.0 \%$. This includes a reduction of 15 bps in the Saudi premium due to opening the market to international investors. This revision, in addition to slight downward revisions in RFR, has added 14.5\% or SR12.2 to our PT
- We have increased the P/E derived PT to SR129.9 (revised up 46\% equivalent to a 2015E P/E of 22.4 x ). This is due to the increased premium over peers. This added SR7.2 or $8.5 \%$ to our PT.

## Jarir

- We revised the equity risk premium from $8.38 \%$ to $8.0 \%$. This includes a reduction of 15 bps in the Saudi premium, due to opening the market to international investors. This revision, in addition to slight downward revisions in RFR, has added SR13.3 or $7.2 \%$ to our PT.
- We have revised the P/E premium over peers to $50 \%$, from $35 \%$, to match the current historical and forward average premium. Despite this, our PT based on peer valuation methodology declined by $3 \%$.
- We have revised downwards our estimate by 4-10\%, mainly due to lower organic growth from the slowdown in consumer electronics market.

## Extra

- Driven by the slight improved outlook and the better than expected 1 H 14 results, we have revised our earnings estimate upwards. As a result of improved margin outlook, lower S\&D expenses and other fundamental factors, our PT went increased by SR14.6 or 12.6\%.
- We revised equity risk premium from $8.38 \%$ to $8.0 \%$. This includes a reduction of 15 bps in the Saudi premium due to opening the market to international investors. This revision, in addition to slight downward revisions in RFR, has added $6.3 \%$ or SR7.2 to our PT.
- According to the current historical and forward average premium over peers, we revised Extra's P/E and P/BV premium from $10 \%$ to $25 \%$. However, overall our PT decreased by around $1.9 \%$ or SR2.2.

## Shaker

- Due to change in the reporting method, following the stake sale in LG Shaker, all profit lines except for net income are not comparable to our previous estimates.
- We have revised our net income estimates upwards significantly, mainly due to the one-off gain reported in 2Q14. Adjusting for this, our estimates for 2014E have declined. However, we believe the outlook remains strong for Shaker, and we therefore maintain our estimates for future years.
- We revised equity risk premium from $8.38 \%$ to $8.0 \%$. This includes a reduction of 15 bps in the Saudi premium due to opening the market to international investors. This revision, in addition to slight downward revisions in RFR, has added $5.1 \%$ or SR4.8 to our PT
- We have reduced the P/E and P/BV premium over peers to match the current historical and forward average premium. This has decreased our PT by $12.6 \%$ or SR11.9.

## CHANGE IN RATING

## Upgrade on improved earnings \& margin outlook

We upgrade AI Othaim to Overweight, with PT rising to SR127.1, primarily driven by strong top-line growth from new store openings and high single-digit organic growth. Sustainability of this growth will be a key catalyst. Additionally, we believe that higher volumes will lead to better terms from suppliers, thereby supporting margin outlook. Execution of new store openings remains a key risk for the company provided the relative difficulties faced by contractors.

- New stores and organic growth key catalysts: Al Othaim plans to open 15 new stores in 2014 after opening 13 in 2013; we estimate 9 stores (7 super markets and 2 corner stores) for 2014 . Furthermore, the company's organic growth remained strong at $9 \%$. We anticipate organic growth to sustain going forward due to the high growth in the Saudi population. We believe new store openings and organic growth will be the key drivers for both top and bottom-line. We estimate revenues to grow $16.4 \%$ YoY in 2014E, with approximately half of this driven by organic growth.
- Margin outlook positive on higher volumes: Due to the progress in opening new stores, we expect margins to expand. This is mainly driven by the company's ability to leverage its higher sales volumes with suppliers, leading to better discounts and rebates. Despite higher gross margins, we estimate Al Othaim's 2014E EBIT/net margin to remain flat on wage inflation concerns (hiring of more locals), in addition to higher cost associated with opening of new stores. However, we expect the OpEx pressure to decrease in the future, on better efficiencies and economies of scale.
- Income from Associate/RE entity gaining traction: During 2008-12, AI Othaim's income from associates (primarily from a $13.65 \%$ stake in its sister company that manages five malls) averaged around $10 \%$ of its reported net income. However, in 2013, this contribution increased to $14 \%$, led by higher rents and increased malls under management. We believe the RE business will play a significant role in AI Othaim's bottom-line growth, especially after the addition of the Hail mall to its portfolio.
- Upgrade to Overweight: We upgrade AI Othaim to overweight, given the strong earnings outlook supported by improvement in organic growth and new store openings. The stock trades on 2015E P/E of 19.0x, a $18.8 \%$ premium to peers, which we believe is justified provided the growth outlook.

## Why do we upgrade Al Othaim to Overweight?

We upgraded Al Othaim to Overweight given the strong fundamentals, growth outlook (organic and expansions) and changes in other valuation metrics since our last update in 1Q14. We have revised our estimates upwards in terms of organic growth and margin outlook. This is due to better than expected 2Q14 earnings, and management feedback. However, we remain conservative on areas such as store expansions due to possible execution risks.

## High single-digit organic growth ...

- We believe that favorable demographics and increasing income supports a strong outlook for the Saudi retail sector. Due to these drivers, Al Othaim has managed to achieve a high organic growth rate of $9 \%$, with management forecasting a sustainable growth rate of $8 \%$ going forward. One of the reasons supporting this growth is the launch of a unique loyalty program Iktissab, which aims to retain customers and building a database to monitor the success of this program. The company has 700,000 active users with Iktissab that constitute around $60 \%$ of sales for the company.

## ...store expansions enhance this growth further

- Al Othaim management is targeting to open 15 new stores per year in Saudi (13 stores in FY13). These stores will be a combination of supermarkets and corner stores. Store openings YTD have been relatively weak ( 6 stores), with the management finding 10 stores to be a realistic figure for 2014. We assume that the company will be opening 7-10 stores going forward.

## Positive margin outlook supported by higher volumes

- We believe AI Othaim could see margin expansion due to the expected sales growth from store opening and organic growth. We believe that higher volumes will better position AI Othaim to negotiate higher discounts/rebates with suppliers. This has been seen through better than expected margins in 2Q14. Accordingly, we have revised our estimates for margins upwards, with EBIT margins at $3.9 \%$ in 2014E (3.6\% previous estimate) and rising to $4.5 \%$ in 2019E ( $3.9 \%$ previous estimate).

CHANGE IN RATING

## Downgrade to Neutral on fair valuations

We downgrade Al Hokair to Neutral with our PT up by 21.4\% to SR123.5. The earnings outlook remains strong driven by aggressive store expansions and improved margins, with the international segment being the major driver. However, the stock is up $75.4 \%$ YTD (vs. TASI at 28\%) and trades at a fair 30.4x FY15E P/E. Execution risk on new stores and volatility in other income remain the key concerns.

- Growth outlook remains strong: We expect AI Hokair to report a strong CAGR of $18 \%$ in net income from FY14-19E. We believe top-line growth will be driven by store expansions and high organic growth. In-line with this, the company has announced in September 2014, the acquisition of 42 woman apparel stores from AI Danah Trading Group for SR383mn.Moreover, the long-term margin stability/expansion will support bottom-line growth. The strong outlook for the fashion retail market in the region and AI Hokair's strong market presence should also support the company's growth outlook.
- International segment a key growth area: An increasing proportion of Al Hokair's revenues and profits are generated from international stores, with international performance improving strongly. We believe this strong performance (revenues up $105 \% \mathrm{YoY}$ in the last quarter) was primarily due to an increase in efficiencies of its 186 stores ( $51 \%$ of total stores in FY14) that opened in the past two years. The management is targeting one-third of total revenues and stores from the international segment by FY17E vs. the current contribution of $19 \%$ and $22 \%$, respectively. We expect revenues from this segment to increase at a CAGR of $30 \%$ to SR3.9bn in FY14-19E.
- Expansion in EBIT margins going forward: EBIT margins currently stand at $12.5-13.1 \%$. Al Hokair has a long-term target of $16-17 \%$, on cost savings in rents, logistics, and various other operational efficiencies. Moreover, the company aims to focus on higher-margin segments, i.e. value fashion segments. We believe the successful execution of top-line growth plans will be combined with EBIT margin expansions. We expect EBIT margin to grow to $14.1 \%$ in FY 18 E vs. $13.1 \%$ in FY 14 , and an average of $11.4 \%$ in $\mathrm{FY} 09-13$.
- Fair valuations; downgrade to Neutral: Although the outlook of AI Hokair remains strong, we downgrade it to Neutral as we believe all the positives are priced in. Al Hokair currently trades at a 2015E P/E of 30.4x compared to sector average of $24.5 x$.

COMPANY UPDATE

## Organic growth and margin expansion key drivers

We remain Neutral on Extra with our PT up 17\% to SR134.5. Results of 2Q14 show a continued trend of improvement, after the short-term pressures seen in 2013. We believe that earnings outlook remains strong with store openings, organic growth and margin expansions being the main drivers. Execution risk and price-led competition remain key concerns.

- Expected recovery after short-term pressures: We expect an improvement in Extra's performance following the short-term negative impacts from Saudisation. The company's revenues grew 1.3\% YoY in 2Q14, despite exceptional sales ( $34 \% \mathrm{YoY}$ ) recorded in 2Q13 from a one-off $10^{\text {th }}$ year anniversary event this supports our outlook on the company. We believe the outlook for Extra will be strong, given its high market share and the expected revival in demand for consumer electronics. With construction activities increasing, we believe that demand for white goods will rise. We expect Extra's earnings to increase at a CAGR of 11.4\% during 2013-2018E.
- Store openings and organic growth outlook key to top-line growth: The strong outlook for Saudi retail sector and its on-going consolidation are the key drivers for store expansion. We expect Extra to open around three/four stores a year till 2018, leading to further increase in its market share. This expansion coupled with improving outlook for organic growth will support the company's top-line growth. We estimate revenues to increase at a CAGR of $10.5 \%$ during 2013-18E.
- Margin improvement key to our outlook: We believe margin outlook remains key for the profitability of Extra. In the past few years, the company's EBIT margins have been declining, largely due to pre-opening costs of new stores. However, margins were flat YoY in 1 H 14 , indicating that the pressure is easing off. Only three new stores opened YTD vs. 20 in the past three years. We expect net margin to remain flat in 2 H 14 ; with any positive surprise from increases in margins being a key catalyst for the stock.
- Fair valuations, relatively in-line with peers: We remain Neutral on Extra with a PT of SR134.5. Organic growth and margins remains key to a sustainable outlook. The stock trades at a 17.5x 2015E P/E and a dividend yield of $2.9 \%$. This yield is relatively in-line with peers.

## COMPANY UPDATE

## Margin expansion remains the key catalyst

We remain Neutral on Jarir with our PT increasing to SR196.5. Despite the opening of three new stores, the top-line growth was weak at $4 \%$ YoY in 1H14. This was primarily due to lower segmental demand from the consumer electronics segment (64\% to total revenues). However, we believe margin expansion remains the key catalyst for the company. The outlook remains strong, but we believe Jarir is currently trading at fair valuations. The 2015E P/E stands at $20.8 x$, representing a $49 \%$ premium over peers.

- Weak top-line growth due to lower segmental demand: Jarir's revenues grew $4.0 \%$ YoY in 1 H 14 , despite opening three new stores. This was mainly led by lower sales from the electronics segment, which contributes $64 \%$ to total revenues. However, we believe the growth outlook for the company remains strong, driven by new store openings and organic growth. We forecast Jarir's revenues to increase at a CAGR of $12 \%$ between 2013-18E.
- Margin expansion to support profitability: We believe the improvement in margins (gross margin up 44bps YoY in 2Q14) will continue as seen in the last few quarters. The company's previous margin contraction was primarily due to the sales from the electronics segment. With the stabilization of the sales-mix, as well as benefits from economies of scale, we expect strong topline growth to be reflected at the bottom-line. We believe that net margin will stand at $13.0 \%$ in 2014E, with it rising to $13.4 \%$ by 2017E.
- New store openings important for growth: Jarir opened three new stores YTD vs. its target of seven new stores in 2014. This follows no new store openings in 2013. We believe that new store openings are a positive top-line growth driver that will further improve Jarir's outlook. We conservatively estimate five new store openings to a total of 37 stores in 2014 . We expect new stores to account for more than half of the $8.0 \%$ expected revenue growth in 2014. Any positive surprises on store openings will provide a further upside for the stock.
- Fairly priced at current levels: We are currently neutral on Jarir with a PT of SR196.5. We believe Jarir's strong outlook supports the current premium of $49 \%$ to peers. The company currently trades at 2015E P/E is $20.8 x$, which we view as a fair valuation.

[^10]
## COMPANY UPDATE

## Outlook improves as market stabilizes

We remain Overweight on Shaker with a PT of SR103.0. We believe that demand for ACs and other household appliances will increase, driven by the relative pick-up in the construction sector. We expect margins to improve supported by lower commodity prices and economies of scale. These factors, coupled with higher income from associates will improve Shaker's profitability. The company is trading at an attractive 2015E P/E of 13.5x.

- Earnings growth outlook to remain strong: We expect Shaker's 2 H 14 net income to increase significantly to SR70.7mn vs. SR0.4mn in 2 H 13 , primarily driven by a SR50mn one-off provision charged in 4Q13 on new energy requirement concerns. We believe the top-line growth will start recovering upon the stabilization of the AC market. The earnings growth outlook for Shaker remains strong and we estimate a CAGR of $2.8 \%$ over 2013-18E.
- Stable/lower commodity prices to aid margins: With raw materials accounting for $60-70 \%$ of COGS, we believe the outlook for copper plays a significant role in the margin outlook. Copper prices declined $4 \%$ YTD and with a stable outlook, we expect it to support margin expansion. However, higher OpEx from wage inflation pressured margins, as seen in 1 H 14 . However, due to higher volumes and economies of scale, we expect the operational cost as a percentage of sales to decline going forward.
- Government contracts and positive housing outlook supports demand: The government's on-going focus to investment in infrastructure remains a key driver of home appliances and AC market. Recently, the Ministry of Education granted a contract worth SR38.3mn to supply LG air conditioners to a number of schools. We believe the increasing population and housing projects will remain the key focus going forward, supporting ACs demand.
- Remain Overweight on attractive valuations: We remain Overweight on Shaker with a PT of SR103.0. We believe the outlook of the AC market remains positive, with Shaker being a key beneficiary of the ongoing government spending benefiting from its large market share in the AC market. The stock is trading at an attractive valuation of $13.5 \times$ P/E 2015E, at a discount of $2.3 \%$ to peers.

## NCBC Investment Ratings

OVERWEIGHT: Target price represents an increase in the share price in excess of $15 \%$ in the next 12 months
NEUTRAL: Target price represents a change in the share price between $-10 \%$ and $+15 \%$ in the next 12 months
UNDERWEIGHT: Target price represents a fall in share price exceeding $10 \%$ in the next 12 months
PRICE TARGET: Analysts set share price targets for individual companies based on a 12 month horizon. These share price targets are subject to a range of company specific and market risks. Target prices are based on a methodology chosen by the analyst as the best predictor of the share price over the 12 month horizon

## Other Definitions

NR: Not Rated. The investment rating has been suspended temporarily. Such suspension is in compliance with applicable regulations and/or in circumstances when NCB Capital is acting in an advisory capacity in a merger or strategic transaction involving the company and in certain other situations

CS: Coverage Suspended. NCBC has suspended coverage of this company
NC: Not covered. NCBC does not cover this company
